* Significantly different from zero at the 90-percent confidence level.

¹The 2003 CPS allowed respondents to choose more than one race. White Alone refers to people who reported White and did not report any other race category. The use of this single-race population does not imply that it is the preferred method of presenting or analyzing data. The Census Bureau uses a variety of approaches. Information on people who reported more than one race, such as "White and American Indian and Alaska Native" or "Asian and Black or African American," in Census 2000 is forthcoming and will be available through American FactFinder in 2003. About 2.1 percent of people reported more than one race.

²Black alone refers to people who reported Black and did not report any other race category.

³Asian alone refers to people who reported Asian and did not report any other race category.

Note: For an explanation of the income measures, see P60-221.
